### SUMMARY

FullStackMERNStack Developer with 1.5 years of experience in frontend and backend development, showcasing expertise in **MongoDB, Express.js, ReactJS**, and **Node.js**. Adept at creating dynamic and responsive web applications, I have effectively contributed to projects at **Bytestan**, focusing on optimizing **UI/UX design** and enhancing overall application performance. Proficient in **JavaScript, HTML, CSS**, and **RESTful APIs**, I thrive in **agile development** environments and possess strong collaboration and problem-solving skills. Looking to join a team as a MERN Stack Developer to create innovative web solutions.

### EXPERIENCE

#### AssociateSoftware Engineer

##### Bytestan

📅

05/2023 - Present

📍

Faisalabad, Pakistan

As an Associate Software Engineer, my work was integral in enhancing various projects.

- Focused primarily on frontend development using ReactJS, creating dynamic and responsive web applications.
- Leveraged Redux for state management, ensuring seamless user experiences across complex interfaces.
- Utilized HTML, CSS, and JavaScript to build and maintain the structure and functionality of web pages.
- Implemented modern, scalable, and consistent styling using TailwindCSS.
- Enhanced the visual and interactive elements of various projects.
- Contributed to a cohesive and efficient development process.

#### Software Engineer Intern

##### Bytestan

📅

03/2023 - 05/2023

📍

Faisalabad, Pakistan

During my internship as a Software Engineer, this experience not only honed my frontend development skills but also provided me with valuable insights into full-stack development and teamwork in a professional setting.

- Focused on frontend development utilizing ReactJS
- Played a key role in building responsive and user-friendly web applications
- Developed and optimized UI components with ReactJS, Redux, and Material UI
- Collaborated with backend teams to integrate APIs
- Ensured seamless data flow between front and back end using NodeJS and ExpressJS
- Implemented dynamic and responsive designs using HTML, CSS, and JavaScript
- Enhanced the application's overall look and feel

#### Information Technology Supervisor

##### Interloop Limited

📅

04/2017 - 09/2023

📍

Faisalabad, Punjab, Pakistan

##### Company Description

- Oversaw seamless operation of IT infrastructure focusing on network administration, telecommunication systems, and IP addressing.
- Led a team in maintaining and troubleshooting critical hardware including PCs, printers, scanners, and network switches.
- Managed IP CCTV surveillance systems to enhance security.
- Handled software installation and troubleshooting to ensure systems operated efficiently and reliably.
- Coordinated preparation and management of Bills of Materials for IT projects.
- Emphasized problem-solving and teamwork to resolve complex IT challenges and deliver solutions aligning with organizational goals.

### SKILLS

MongoDB	Express.js	React.js	Node.js	JavaScript	HTML/HTML5	CSS/CSS3	Git	GitHub
RESTful APIs	CI/CD	Agile Methodologies	Tailwind CSS	Bootstrap	Material UI			

# PROJECTS

## The Wild Oasis

- [the-wild-oasis-ashen-three.vercel.app](#)
- Developed **The Wild Oasis**, a scalable web app using **React**, **styled-components**, **React Router**, **React Hook Query** and **Redux** for state management.
- Integrated **Supabase** for real-time backend services and **Pi-chart** for interactive data visualizations.
- Enhanced user engagement with **real-time notifications** via **React Toast**.

## Single Mixer

- <https://singlesmixer.eu/>
- Developed a responsive singles mixer web application using **React.js** for dynamic user interface components,
- Tailwind CSS** for modern, utility-first styling, **React Router** for client-side navigation, and **Axios** for handling API requests.
- Focused on building modular, reusable components and maintaining clean state management with React Hooks.

## Forever

- [ecommmerce-frontend.vercel.app/](#)
- Front-end for a high-performance e-commerce solution built with **React JS**—leveraging server-side rendering, **React Server Components**, **Suspense**, and **App Router**, styled using **Tailwind CSS** and deployed on **Vercel**.
- Ensuring edge-powered delivery and seamless developer workflow, as a headless storefront, enabling flexible integration with commerce **backends Nodejs**, **Express Js**, **Mongoose** and **MongoDB**.

## GurThimpu

<https://gurthimpu.org/ignite-2024/>

Built a dynamic community platform for Tamil Trust using **React.js** for frontend development, focusing on clean component architecture and efficient state management.

- Implemented user-friendly donation forms, event management pages, and informational sections using **Tailwind CSS** for responsive design.
- Integrated **Axios** for seamless API communication, ensuring smooth data retrieval and submission for trust activities and community support.
